AST Software

Engineered to be easy to use, Vigore helps to streamline the flow of your fast paced, high demand operation. Retail as well as restaurant operations will appreciate fieatures such as order taking, barcode scanning, delivery, employee time clock, and inventory control.

The software used by your main POS station, Vigore was created with the customer in mind, and is a reflection, of every business owner's greatest needs. Supporting everything from payment processing to back office computing, Vigore makes managing any restaurant or retail store easy.

VIGORE

EPIC POS

Epic POS is the most reliable and affordable mobile Android POS in the market today. Coming in two different versions, Epic POS Pro and Epic POS Lite, Epic POS supports a wide array of features including tablet service, mobile payment processing, quick service, and much more.

Epic POS Pro is the truly complete POS solution as it comes equipped with an additional reservation module and is also able to integrate with multiple devices to maximize your business' potential. Truly a standalone POS device, Epic POS Lite needs neither Wifi nor a main POS station to be functional. Just grab it and go, Epic POS Lite is ready for service.

Ambient POS

Ambient POS represents the fusion of the functionality and ease of us of Vigore with the enhanced interface and design of Apple's iPad. Simple and easy, Ambient POS provides your business with greater speed and flexibility.

All that you need is a local POS terminal equipped with our Vigore software, and any iPad tablet with our Ambient POS software will work seamlessly with your network printers, Wifi, and other iPads.
